Face Detection with Automatic Red-eye Removal

Face Detection automatically detects faces, setting focus and exposure for clear, sharp faces with natural skin tones. And with Automatic Red-eye Removal, the J30 automatically checks for and corrects red eyes in detected faces during playback.

Picture Stabilization Mode / Anti-blur Mode

Picture Stabilization Mode / Anti-blur Mode automatically corrects for camera shake and subject blur, helping you to capture fleeting moments in crisp stop-action with background detail intact.

Micro Thumbnail View

Up to 100 pictures can be viewed at a time in a 10x10 array of micro thumbnails. Convenient for smooth and comfortable playback.
